- Considers software development is both a career and a hobby.

- Keeps my software development skills updated to ensure that I am always using a great development stack and my knowledge is always relevant and evergreen.

- Builds personal software systems with an eye on software security on every aspect of my development.

- Always ready to adapt to changes in my development environment and learn new programming languages to make sure I use the most suitable technologies to solve the problem at hand.

- Always eager to learn beyond traditional ways using online recognized resources.

**EDUCATION**

## Bachelor of Technology in Computer and Electronics Systems

Mount Kenya University**,** Thika —*B tech*

May 2018 - PRESENT.

**PROJECTS**

## Portfolio Project — *A showcase of a few of my skills*

This is project is meant to showcase some of my skills. The project has projects and blog sections that portray the ability to create and consume a REST API and work with *lob storage in SQL databases. This is the link → https://victormwangi.netlify.app

*Technologies used :*

1. Spring Framework, Spring Boot, Spring JPA, Spring Security(based on java 11)

2. PostgreSQL database

3. React js

4. Tailwind CSS

5. Craco, Emotion and styled components for CSS processing.

Other projects can be found at → https://github.com/vikie1 or at
